

Scanner Frequencies for the Polk County Area

It is now official – the Polk County NC area is now switching over to trucking radios. This means that both voice and digital are on the same frequency making monitoring unpleasant. Trunking is used for the Spartanburg and Greenville SC Counties as well. Note that the Landrum area is also dispatched through Spartanburg County Dispatch and all frequencies are via county channels. Trunking requires a special Scanner that can decode and track the signal hopping that these systems use. These scanners are not reasonable in cost.

Currently Polk County dispatches on two primary frequencies. Sheriff & Law Enforcement is 151.130 and Fire & EMS is 154.965 - both frequencies are now both FMN or FM Narrow Band and Trunking or digital. All current scanners will receive this transmission but the digital mode will dominate. I am told that the operating system is NEXEDGE and the Motorola APO 25 series 2.

I am told that Tryon is using NXDN which is part of the NEXEDGE system for their radios. This will transmit both Digital (Computer) and Voice over the same radio. Makes listening to their radios difficult as you have to put up with the digital CPU data streams.

Two companies that will help you are scannermaster.com and bearcatwarehouse.com. They can advise you what you might consider getting. If you know what you might want they look for it on amazon but make sure it is sold and shipped by amazon and not a third party.
